2012-2011 Future Damage and Present Value Calculator

by Steve Weintraub

Now estimate worklife values more accurately! Our 2012-2011 Future Damage and Present Value Calculator contains human life expectancies and years of participation in the labor force by sex, age, education level and ethnicity. Whatever type of case you're working on, you will find the information you need without wasting hours on research. Ideal for use in trial, research, settlement conferences, and structured settlement offers.

Additionally the calculator contains the average life expectancies for twenty-nine countries, more than ever before! Countries featured on the 2012-2011 calculator include the United States, Canada, Afghanistan, Australia, Austria, Belgium, Brazil, China, Cuba, Finland, France, Germany, Greece, India, Iran, Iraq, Ireland, Israel, Italy, Japan, Netherlands, North Korea, Mexico, Pakistan, Portugal, Russia, South Africa, Spain, the United Kingdom, and Vietnam as well as a worldwide average life expectancy. The new calculator also reflects annual changes in life expectancies for the male and female populations, as well as the total population size, of the countries listed. All life expectancy data has been updated for 2012 with the most recent figures.

The flip side of the calculator provides the Present Value Tables sorted by a wide range of interest rates showing the present value of future lost earnings or any other anticipated annual future damages. The 2012-2011 calculator contains expanded Present Value Tables including 7 and 7.5 percent, which are important for calculating worker's compensation claims.

Train Accident Reconstruction and Litigation, Fifth Edition	Dec. 2012

Nursing Malpractice, Fourth Edition (two volumes)

edited by Patricia W Iyer, MSN RN, LNCC, Barbara Levin ,BSN, RN, ONC, LNCC, Kathleen C. Ashton, and Victoria Powell

An outstanding reference for the attorney, legal nurse consultant, insurance claim adjuster, healthcare risk manager, or healthcare facility leader involved in a nursing malpractice claim. This newly revised *Nursing Malpractice, Fourth Edition*, Volume 1 and Volume 2 is designed to give you a comprehensive overview of nursing malpractice litigation. This extensively revised and updated edition of a classic covers the spectrum of the nursing process--from the neonate to the oldest nursing home resident. It gives a comprehensive overview of nursing responsibilities.

Nursing Malpractice, Fourth Edition consists of two separate books: Volume 1 and Volume 2. Volume 1, *Foundations of Nursing Malpractice Claims*, covers broad range topics such as patient safety, nursing practice, damages, and litigation of nursing malpractice claims. Included are new chapters on the view of the actuary and e-discovery.

Volume 2, *Roots of Nursing Malpractice*, takes a closer look at more specific roles, with detailed chapters on obstetrics, critical care, psychiatric, medical surgical, orthopaedic, managed care and emergency nursing, among many others. Included are new chapters on respiratory care, school nursing, dialysis therapy, telephone triage, nurse practitioners, healthcare-acquired conditions, and falls and their consequences.

A unique blend of attorneys, nurse attorneys, nurse expert witnesses, legal nurse consultants, physicians, pharmacists, toxicologists, jury consultants, actuaries and legal photographers contributed chapters for this book. This text remains the only one on the market written for attorneys on nursing malpractice using such a broad base of expert authors. In short, this comprehensive book is an excellent and important addition to your nursing malpractice library.

Brand new! Accident Reconstruction Science, Fourth Edition

by Alan J. Watts, Ph.D.

Examines the science of reconstructing and analyzing an automobile accident. Written for the reconstructionist, attorney, automotive engineer, or other interested professional, this brand new edition examines the science of reconstructing and analyzing an automobile accident. Learn how to analyze accidents and judge speed from the final position of the vehicle.

Also covered are topics such as sideswipe collisions, rollovers, calculations of collision timing and accelerations and measuring vehicle crush, among many others. Dr. Alan Watts explains basic concepts of physics, and then applies them to accident reconstruction. The text will be readily understood by any reader with a basic understanding of accident reconstruction; however, full details and equation derivations are provided for those with either higher technical education or a wish to more fully understand the issues.

Forensic Visibility

by James L. Harris, Sr. and James L. Harris II

Brand new!

An important text that explains many subtle and complicated aspects of forensic visibility. It begins with a broad introduction to the human visual system, including visual detection, visual search, contrast threshold, background luminance, complex backgrounds, and eyewitness testimony. This is a fitting introduction for any professional looking for insight into this complex topic.

This book covers chapters pertinent to accident reconstructionists, including visibility related to pedestrians and automobile accidents. What roles did intersection lighting and pavement luminance play? How reliable are distance estimates given by eyewitnesses? How does disability glare affect the system of the eye? These questions and more are discussed in detail.

Pages: 142 • Softbound • Size: 6" x 9" • Price: \$29

Foreseeable Risk

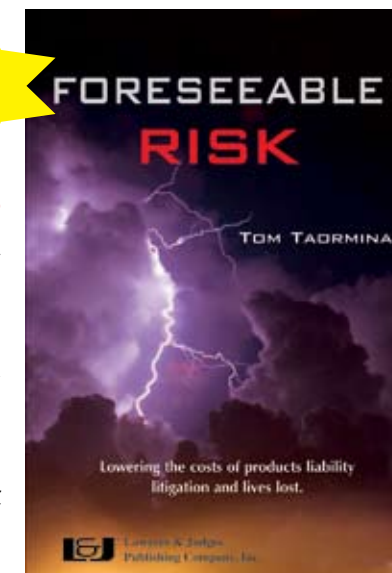

by Tom Taormina, CMC, CMQ/OE,
Forensic Business Pathologist®

Brand new!

Diagnose business health and well-being to new standards of precision and practicality. On both sides of litigation, cadres of expert witnesses relentlessly write conflicting reports and give obtuse testimony often leaving the decisions of causation and consequences to the emotional consensus of a jury.

This book offers an approach to product liability litigation called Forensic Business Pathology® (FBP), a proprietary methodology used to evaluate the integrity of the business management, quality control and manufacturing practices of a defendant company. The outcome of an FBP investigation can show irrefutably that a company either did or did not exercise an appropriate standard of care, discipline and social responsibility in the production of the subject product or service.

Motorcycle Accident Reconstruction & Litigation, Fifth Edition

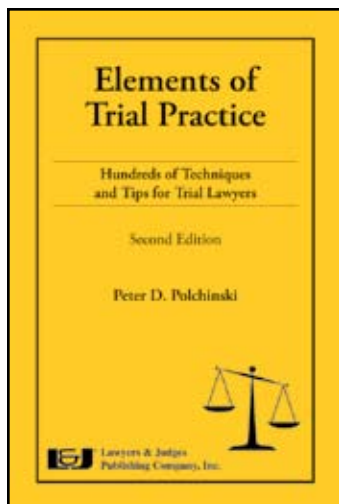

by Kenneth Obenski, PE, Paul Hill, J.D., Eric Shapiro, A.S.E., and Jack Debes, Ph.D.

Explains the unique mechanics of riding a motorcycle. The experienced authors of this book are experts in the special techniques of reconstructing a motorcycle accident. Learn the most useful, successful, and specialized techniques for reconstructing these accidents.

Rider safety considerations and human factors issues such as conspicuity, evasive action, rider warning, and rider experience are discussed in detail. In the revised and updated legal section, you can read through expanded case examples, drawing on concepts already described in the technical section. This edition includes accident cause factors and identification of countermeasures, commonly known as "The Hurt Report," on CD-ROM.

Product Code: 5031-MA • ISBN: 978-1-933264-32-5 • CD-ROM Included
Pages: 380 • Casebound • Size: 8.5" x 11" • Price: \$109

Elements of Trial Practice, Second Edition

**Brand
new!**

by Peter D. Polchinski, Esq.

To win at trial, you must present your case clearly, simply, persuasively, and fairly, while you undermine your adversary's case in the same manner. Achieving excellence in trial advocacy is a life-long pursuit. Nevertheless, trial skills and a basic understanding of this art can be learned quickly. Short and persuasive, this new second edition of a classic wastes no words. You'll discover how to

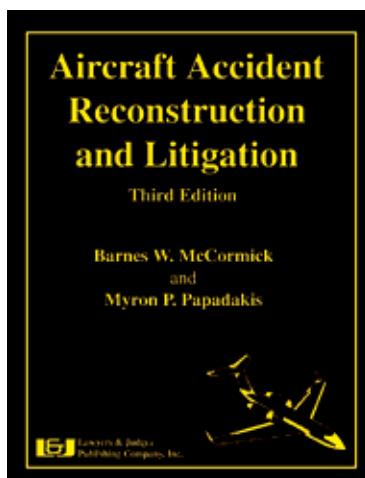

select a favorable jury, prepare your witnesses, deliver powerful opening statements, conduct an effective direct examination, cross-examine any witness, introduce exhibits, impeach their witnesses, control consulting experts, and win the case on summation.

Elements of Trial Practice will become your essential, instant-access reference for trial. Armed with its many valuable techniques, you will approach trial practice with new enthusiasm and confidence.

Product Code: 6060-MA • ISBN: 978-1-933264-69-1
Pages: 144 • Casebound • Size: 6" x 9" • Price: \$39

Aircraft Accident Reconstruction and Litigation, Fourth Edition

by Barnes W. McCormick Ph.D., PE and Myron P. Papadakis Esq., J.D., CAP

Provides a source of technical and legal information to participate intelligently in the search for probable causes and discussion of the legal aspects of aircraft accidents. Readers will appreciate the book's refreshing review of the elements of aerodynamics, structural design, powerplants, aircraft control techniques, as well as the nuances of applicable law such as product liability and negligence. The appendix itself is a learning experience.

This book could be used as a postgraduate guide for the hardware-oriented aircraft accident investigator, especially the sections on human errors and human factors.

Product Code: 5155-MA • ISBN: 978-1-933264-76-9
Pages: 928 • Casebound • Size: 8.5" x 11" • Price: \$199

The Persuasive Edge

by Richard Crawford, Ph.D. and Charlotte Morris, M.A.

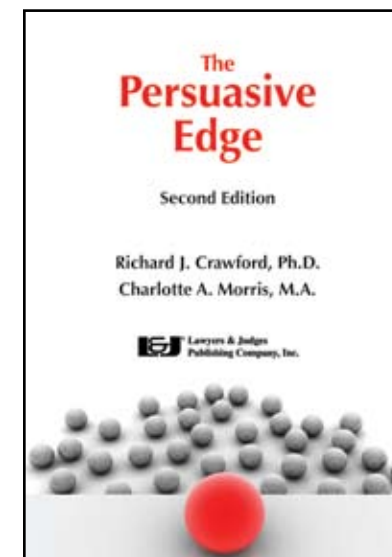

Improve your influence and advocacy in human persuasion. Purposeful communication will strengthen your ability to persuade. Drawing on the premise that persuasion must be purposeful, *The Persuasive Edge* lays out the case for making meaningful choices at each stage in trial preparation and at trial.

This straightforward discussion helps you by combining the psychology of human persuasion and decision-making with the practical knowledge acquired from litigation, to offer you a more purposeful and practical approach to improving your human persuasion. As trial consultants, the authors have had the opportunity to test modern persuasion techniques and research by working inside jury trials and conducting interviews with thousands of jurors.

The Persuasive Edge is a must for every trial lawyer, teacher and student of law or communication, and anyone else whose practice or profession depends on human persuasion. Regardless of your specialty or years of experience, your advocacy will be enhanced by the deliberate communication choices identified and illustrated in this book.

Assessment of Earning Capacity, Third Edition

by Michael S. Shahnasarian, Ph.D.

Extensively revised and updated, including a new chapter on long-term disability insurance cases. Now you can become an expert in determining your client's earning capacity. This book introduces you to vocational expert services, guiding you through consultation and the standard methods.

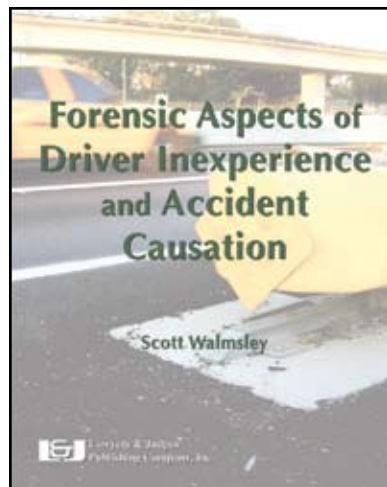

It presents tips on appearing as an economic expert in court. You will learn what is required for trial preparation and testimony. Discover sample deposition questions and tips to aid you in presenting a professional demeanor while undergoing intense cross-examination. *Assessment of Earning Capacity* contains many examples to help you understand the expert's job.

Product Code: 6079-MA • ISBN: 978-1-933264-97-4
Pages: 304 • Casebound • Size: 8.5" x 11" • Price: \$85

Forensic Aspects of Driver Inexperience and Accident Causation

by Scott Walmsley

**Brand
new!**

Equally useful to legal professionals, accident reconstructionists, insurance professionals, and driver education instructors, among others. To understand why inexperienced drivers are responsible for a significantly disproportionate percentage of collisions, a detailed examination and analysis of multiple traffic scenarios, driving tasks, human behaviors, perceptions and environmental conditions is required.

This book discusses over 50 skill deficiencies common among inexperienced drivers that increase collision probability, describing how these affect perceptions, judgments, behaviors, reactions, decisions, and actions, giving you insight into the human factors that are common among inexperienced drivers.

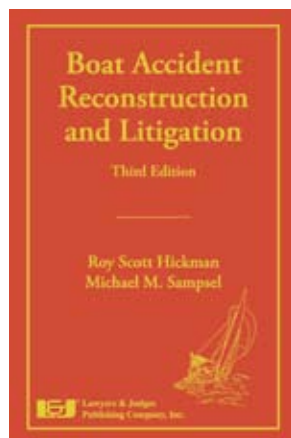

This book discusses the emotional and perceptual factors involved in errors among inexperienced drivers. Fear, impatience, aggressiveness, and a sense of entitlement can supplant the logical thought process, thereby increasing errors.

Boat Accident Reconstruction and Litigation, Third Edition

by Michael M. Sampsel, PE, and Roy Scott Hickman Ph.D., PE

**Brand
new!**

This updated and revised edition has even more information to help you understand the complexities of boating accidents. Whether you are a beginner or experienced litigator or any expert dealing with a boat accident, the information contained in this excellent resource will save you hours of research time hunting through less complete texts and online services.

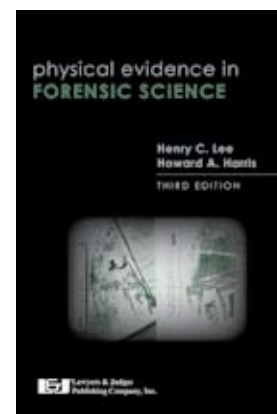

This book will help you find appropriate data, analyze it, and determine cause in a boat accident. The third edition of *Boat Accident Reconstruction and Litigation* covers everything from the way boats function to how they are designed. It also introduces you to fluid mechanics and explains the numerous formulae and other methods used to analyze boat accidents.

Physical Evidence in Forensic Science, Third Edition

by Henry C. Lee, Ph.D. and Howard A. Harris, Ph.D., J.D.

**Brand
new!**

A brand new edition by America's leading forensic scientists, giving you an insider's understanding of physical evidence at the crime scene. This outstanding guide, by the nation's foremost forensic scientists, introduces you to the basics of a solid and successful investigation. This extensive resource is packed with valuable information about the details of collecting, storing, and analyzing all types of physical evidence, including light, smoke, bullet identification, transient and pattern evidence, postmortem lividity marks and other special imprints and indentations, odors, wet versus dry blood samples, crime scene reconstruction techniques, and recognition and coordination of all elements of the crime scene during and after investigation.

This new edition of a classic is a must-have for all investigators, law enforcement agencies, trial lawyers, and others involved in the investigative process.

Elevator and Escalator Accident Reconstruction and Litigation, Third Edition

by James Filippone, P.E., Joel D. Feldman, J.D.,
Ronald D. Schloss, and David A. Cooper

**Brand
new!**

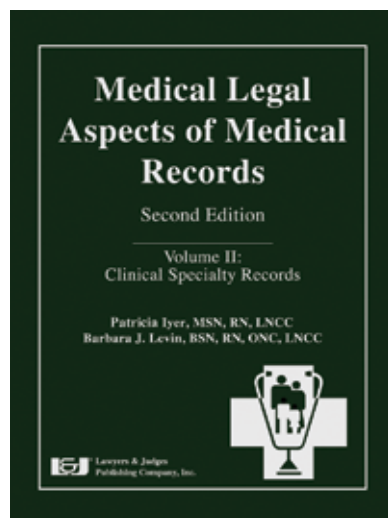

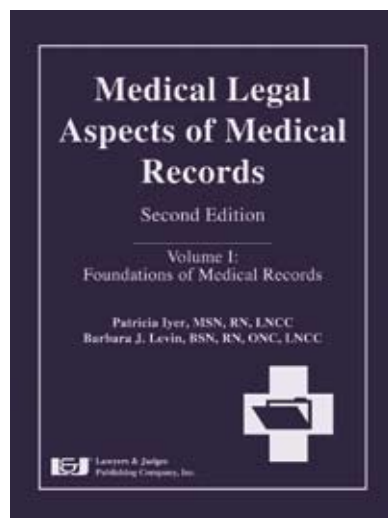

Gives you a basic understanding of the issues you need to understand to proceed with confidence. You're considering the case of a maintenance worker injured while repairing an elevator, or an elderly woman hurt on a department store escalator. An initial search of the literature turns up almost nothing useful. Your instinct tells you the cases are good, but to evaluate them properly, you need this latest addition to our litigation series, *Elevator and Escalator Accident Reconstruction and Litigation*.

The key questions are: what caused the accident, and what were the contributory factors? Some accidents have an element of "in the wrong place at the wrong time" about them, while others have an element of disregard for the equipment involved. Sadly, others fall into the category of sheer negligence or incompetence. The authors' expertise will guide your decision-making process on whether to accept or reject cases.

Product Code: 6249-MA • ISBN: 978-1-936360-04-8
Pages: 448 • Casebound • Size: 6" x 9" • Price: \$99

Medical Legal Aspects of Medical Records, Second Edition (two volumes)

edited by Patricia W Iyer, MSN RN, LNCC, and Barbara Levin, BSN, RN, ONC, LNCC

The reference of choice for cases involving medical records and their use. This book has been divided into two volumes for ease of finding the information you need. Both volumes have been updated to give you the latest information, as recent changes in legislation and technology have changed the medical records process. The authors have designed this work to give extensive information on the HIPPA policies, standards initiatives, legal use of records, billing and coding, and computerization of records and record keeping systems and how they apply in forensic situations.

You can use Volume I for a comprehensive overview of the medical records process. In any health care situation, records are made, and each situation presents its own unique aspects and challenges. This book explores the many aspects of medical records that apply across all specialties. It is specially designed to complement Volume II.

You can use Volume II for in-depth information on many clinical specialties. This book informs you of the specific nature of clinical and hospital specialty records, including chapters on dental, chiropractic, nursing home, pediatrics, medication, and home care. It is specially designed to complement Volume I.

Used jointly, these two volumes are a powerful tool for your practice and are exceptionally valuable to all those in the legal profession or in law enforcement who deal with medical records on a regular basis.

Volume I

Garriott's Medicolegal Aspects of Alcohol, Fifth Edition

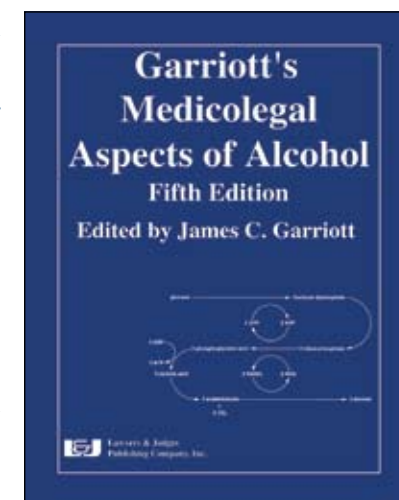

edited by James C. Garriott, Ph.D.

The gold standard for anyone involved with the medicolegal aspects of alcohol. Your invaluable resource in investigating and litigating cases involving alcohol. The many different components present in alcohol-related criminal and civil cases combine to make this a complex topic. You need an authoritative book that covers all these elements.

This fifth revised edition of the original text, *Medicolegal Aspects of Alcohol in Biological Specimens* (1988), continues to provide you with up-to-date and authoritative information on all of the forensic aspects of alcohol. The original authors have updated science and information in their topic areas, and new authors with special expertise have been brought on board. All topics in the original book have been revised and expanded, and new sections include prosecution and defense of DUI cases.

Product Code: 0888-MA • ISBN: 978-1-933264-58-5

Pages: 536 • Casebound • Size: 8.5" x 11" • Price: \$139

reviews

what they're saying

" A lawyer without books is like a bird without wings. While both exist, they are rare and regarded with suspicion. For any lawyer serious about defending DUI cases, there are certain books that simply must be on the shelf. Here are the top books:

...

2. Medical-Legal Aspects Of Alcohol, edited by James C. Garriott covers all of the essential science in an easy to understand format. The book is small enough that it travels well to court, and is considered authoritative by many judges and expert witnesses. It is published by Lawyers & Judges Publishing Company. "

Dan Jaffe

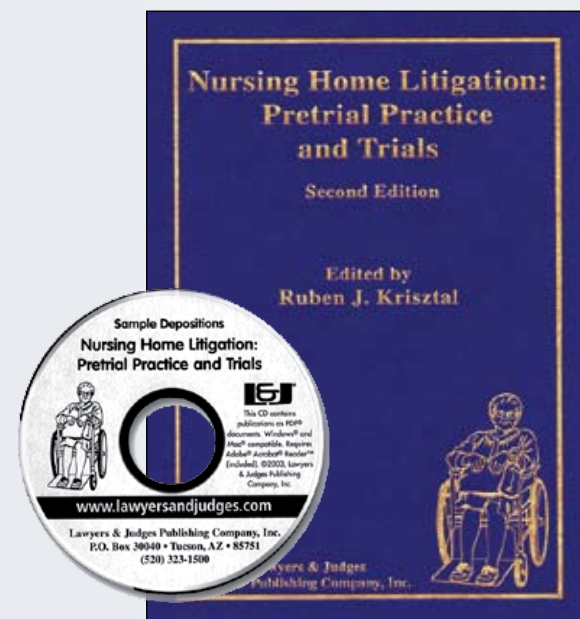

<http://blog.duiattorney.com>

September 29, 2008

nursing home essentials

“ Equally telling, however, is the range and depth of experience of the other sixteen contributing authors not all of whom are lawyers. It is this collection of experience that gives this book its strength. ”

—Jesus C. Q. Garza, Wisconsin Lawyer

Nursing Home Litigation: Pretrial Practice and Trials, Second Edition

edited by Ruben J. Krisztal, J.D.

A must-have reference when you're involved in a nursing

home case. The litigation of neglect and abuse of the elderly in assisted living and nursing home facilities is unlike any other personal injury litigation. This expanded second edition provides you with a detailed step-by-step look at how nursing home cases should be handled.

The book's chapters are organized to help you with your case from pretrial to trial. They provide tips and techniques for writing the demand letter. You'll get invaluable insight (for both plaintiff and defense attorneys) on topics such as interviewing older witnesses, preparing staff for depositions, demonstrative evidence, voir dire, and opening and closing arguments. You'll also receive a FREE CD-ROM of actual depositions of nurses, administrators, and upper management in nursing homes.

Product Code: 5813-MA • ISBN: 978-1-930056-48-0 • CD-ROM Included
Pages: 627 • Casebound • Size: 6" x 9" • Price: \$119

reviews

what they're saying

“ The book is also an excellent resource for those serious litigators who decide to move into the area of nursing home litigation and who are not familiar with its complexities. Although not addressed to non-litigators, they will benefit from the book.

Nursing Home Litigation: Investigation and Case Preparation will be a useful and practical addition to the library of the nursing home litigator as well as the general elder law attorney. ”

—Jonathan W. Reich, Esq., NAELA News

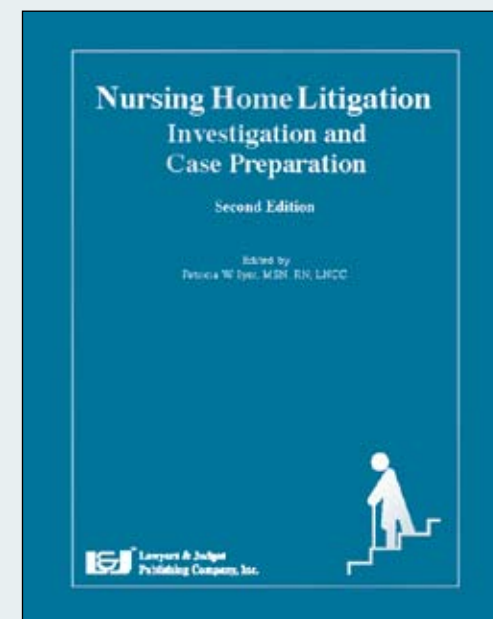

Nursing Home Litigation: Investigation and Case Preparation, Second Edition

edited by Patricia W. Iyer, MSN, RN, LNCC

This comprehensive text is a necessary legal and medical reference for everyone working with nursing home, assisted living, long-term care, or elder law cases. Your nursing home and eldercare litigation team should have a copy of this book. Each chapter has been revised and updated while new chapters have been added to provide detailed information on even more issues and cases in nursing home litigation.

Composed of four specialized sections discussing legal strategies, this book lets you capitalize on its knowledge during the investigation and case preparation stages of your case. Topics include legal strategies, liability issues, common allegations, and tips for defending nursing home, long-term care and assisted living facility cases. This analysis includes information on defense perspectives and strategies on many types of nursing home cases as well as insurance adjusters' perspectives on nursing home cases pertaining to insurance claims. Reading this book will improve all aspects of your case.

Product Code: 5643-MA • ISBN: 978-1-933264-00-4
Pages: 720 • Casebound • Size: 8.5" x 11" • Price: \$149

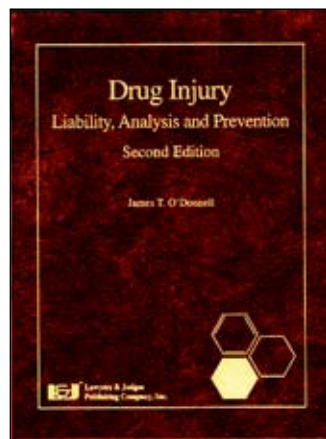

Drug Injury: Liability, Analysis and Prevention, Second Edition

edited by James T. O'Donnell, M.S., Pharm.D., DABCP, CNS, FACN, RPh

An indispensable text, with comprehensive and crucial information. Drug-induced injury cases are as complex as they are common. While the injury to the patient might seem obvious, in reality that has very little effect on litigation. Evaluating each case for merits becomes especially important. To successfully accomplish this, you need the knowledge of pharmaceuticals and drug manufacturing that the authors have carefully detailed in this book.

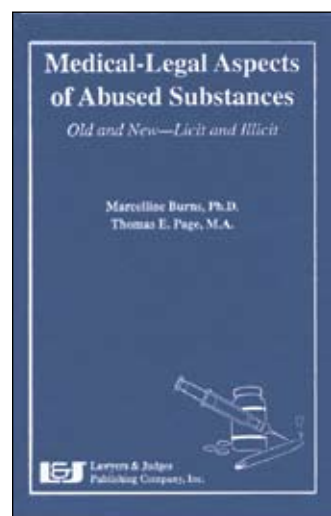

Easy for the non-medical professional to follow, the book is divided into three useful sections dealing with the pharmaceutical process, high-risk drug therapies that result in litigation, and professional pharmacist and malpractice claims.

**Product Code: 6044-MA • ISBN: 978-0-913875-27-8
Pages: 894 • Casebound • Size: 8.5" x 11" • Price: \$149**

Medical-Legal Aspects of Abused Substances: Old & New—Licit & Illicit

edited by Marcelline Burns, Ph.D. and Thomas Page, M.A.

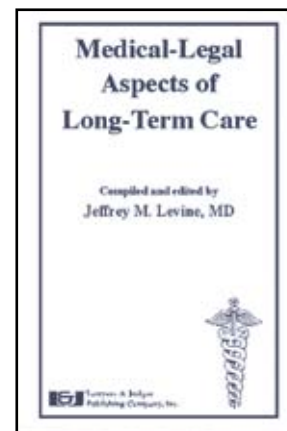

If you handle cases involving substance abuse or need detailed information on newly compounded substances or re-discovered drugs of abuse, this is your reference of choice. The authors discuss the role of law enforcement officers in abused substance cases, double standards in enforcing substance abuse laws, driving under the influence of drugs as opposed to alcohol, and legal and prosecution perspectives regarding drug cases. This book contains much valuable information and is a must for anyone who regularly deals with prosecuting or defending substance abuse cases.

As drug use is an international problem, the authors also present case studies of Turkey and Australia's laws pertaining to abused substances and driving, and how they were developed. This information is particularly valuable to those involved in the creation of substance abuse legislation.

**Product Code: 6834-MA • ISBN: 978-1-930056-83-1
Pages: 248 • Casebound • Size: 6" x 9" • Price: \$79**

Medical-Legal Aspects of Long-Term Care

compiled by Jeffrey M. Levine, M.D.

A premier source of information on basic medical aspects of nursing home care, with an emphasis on topics of medical-legal importance. With over 1.7 million elderly persons currently in nursing homes in America, and because of their medical complexity, this group is prone to poor outcomes such as falls, accidents, pressure ulcers, infections and death. In recent years, damage awards by juries in negligence cases involving elderly persons have soared. By reading this book, you will obtain an overview of the issues in this field, and gain an edge in getting damage awards in your cases.

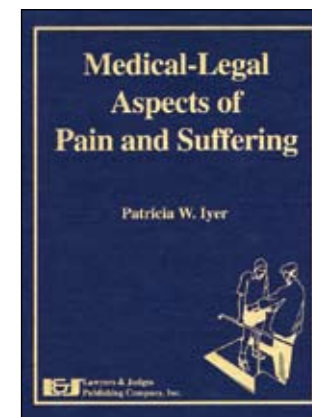

Medical-Legal Aspects of Long-Term Care is designed as a reference source for attorney and laypersons interested in the topic of neglect and abuse in nursing homes. It provides a framework for understanding when a poor outcome is a result of negligence on the part of the caregiving facility and its personnel.

**Product Code: 6230-MA

Size: 6" x 9" • Price: \$95**

Medical-Legal Aspects of Pain and Suffering

compiled and edited by

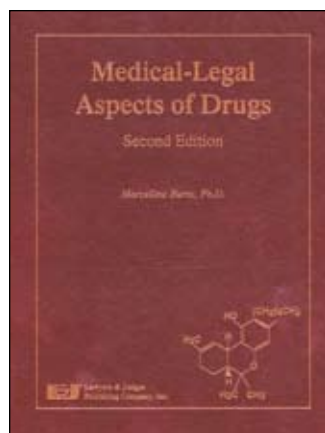

Patricia W. Iyer, MSN, RN, LNCC

This book provides you with detailed information on how to analyze pain and suffering cases. Get an edge by reading chapters from leading legal nurse consultants, physicians and attorneys. Each section of this valuable text is designed to fully explain each aspect of this hot topic in health care.

This book also helps you understand medical records and commonly used pain assessment tools. It focuses on high-risk populations, pain and suffering in children, and cancer pain. Read about how to maximize your presentation of pain and suffering cases in the courtroom. By combining the clinical information in the first two sections with the legal strategies in the last section, this book becomes a must read for any attorney litigating medical, nursing, or nursing home negligence cases.

**Product Code: 6397-MA
ISBN: 978-1-930056-39-8
Pages: 544 • Casebound
Size: 8.5" x 11" • Price: \$139**

Medical-Legal Aspects of Drugs, Second Edition

compiled and edited by Marcelline Burns, Ph.D.

Your source for essential knowledge about drugs. Drugs of choice and use trends have changed and new issues have surfaced. Drug options have expanded with the discovery and re-discovery of intoxicating plant materials and the development of new compounds in both legal and illegal laboratories. The use

and abuse of drugs will continue, and you need a way to keep up.

Medical-Legal Aspects of Drugs addresses the challenge of this dynamic and pervasive problem with accurate, cutting-edge information from acknowledged experts. You'll learn about psychoactive drugs, the effects of various kinds of drugs on behavior, and the development of anxiolytics, antidepressants, and antihistamines. These medications have become popular as raw materials or as intoxicants themselves, producing a host of new issues and problems to be addressed.

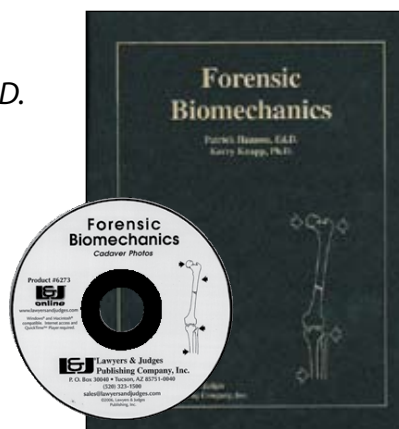

This book also provides you with all the information you need on the effects of drug use on employees in the workplace. Drug detection methods and the legal issues surrounding the practice of mandatory testing for drugs are also discussed.

Forensic Biomechanics

by Patrick Hannon, Ed.D. and Kerry Knapp, Ph.D.

Invaluable for your accident or injury case by helping you understand the principles of the biomechanics behind the injury. This new reference gives you an in-depth look at the area of human injury biomechanics. It also discusses the role of the biomechanist and when and how she can help with your investigation. The authors discuss biomechanical causation versus medical causation, the basic principles of biomechanics, approaches to the use of biomechanics in investigation, and application of biomechanical principles to impact injuries. They also provide detailed information on the biomechanics of the human body including bone tissue, articular cartilage, soft tissue, blood and fluids, spinal cord and nerve tissue, joints, and extremities. This book contains more than 300 diagrams and images plus a FREE CD-ROM of cadaver photos illustrating the principles discussed.

Product Code: 6273-MA • ISBN: 978-1-933264-52-3 • CD-ROM Included

Electrical Injuries: Engineering, Medical and Legal Aspects, Second Edition

by Robert E. Nabours Ph.D., PE, Raymond M. Fish Ph.D., M.D. and Paul F. Hill Esq.

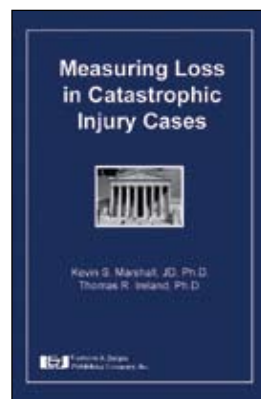

The most complete summary of electrical injury issues for the electrical injury litigator and investigator. Electric currents and electromagnetic radiation can produce harmful biological effects in humans; these effects are the subject of an ever growing number of lawsuits.

Part I explains the role of forensic electrical engineers, and covers electrical codes and standards, basic electrical systems, and reconstructing the electrical accident. Part II covers the medical aspects of electrical injuries, including the consequences of electrical injury on the body, EKGs and pacemakers, accident reconstruction in electrical injury cases, common sources of electrical injury, and relevant medical literature. Part III is a survey of appellate decisions in cases involving electrical injuries. It gives the attorney, engineer and accident reconstructionist a valuable resource for investigating, evaluating and settling or litigating claims arising from electrical injuries.

Measuring Loss in Catastrophic Injury Cases

edited by Kevin Marshall, J.D., M.P.A.,
Ph.D. and Thomas Ireland, Ph.D.

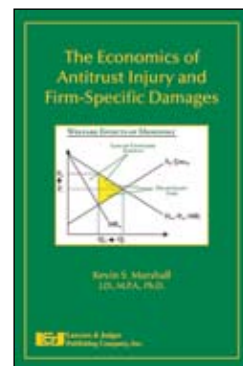

This accessibly written resource addresses the loss measurement issues confronted in catastrophic injury cases.

The measurement of loss in such cases is an interdisciplinary effort involving many specialists including economists, rehabilitation counselors and therapists, health care providers, life care planners, attorneys, the patient and his family, and others. Areas covered include the interdisciplinary nature of measuring loss, the role of the forensic economist in determining loss, working with life care planners and rehabilitation and vocational experts, impact of a reduced life expectancy, types of settlements including annuities, structured settlements and periodic payment judgments, and suggestions for building an expert damages team when working on this type of case. You'll find the information necessary to assess and derive a fair and accurate measurement that will compensate the injured party and/or the family for the actual losses.

The Economics of Antitrust Injury and Firm-Specific Damages

compiled and edited by
Kevin S. Marshall, J.D., M.P.A., Ph.D.

Teaches you the fundamentals of microeconomics as they relate to the administration and enforcement of antitrust laws. This text instructs you in the fundamental economic constructs for analysis of antitrust injury, and addresses legal and economic issues related to the measurement of antitrust damages. Each chapter provides you with critical insight into the analysis and measurement of competitive injury and resulting business damages. You will learn about monopolies, cartels, deadweight loss, valuing lost opportunities, methods for proving antitrust damages, microeconomics vs. jurisprudential economics, and more.

Each of the contributing authors is recognized for his or her scholarship and expertise in the antitrust regulatory field. Their varied backgrounds and experiences illustrate, for you, the interdisciplinary nature of regulating competition in the markets of the world.

Life and Worklife Expectancies, Second Edition

by Hugh Richards, M.S. and Michael Donaldson, Ph.D.

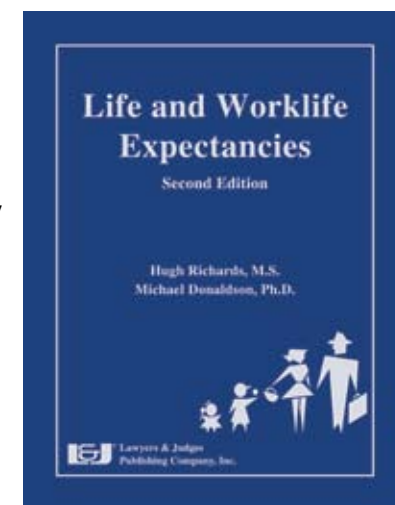

Now the information you need for determining life and worklife expectancies is in one complete volume right at your fingertips. Search by smoking status, education, race, persons with medical conditions, and more. Our brand new *Life and Worklife Expectancies, Second Edition* now features extensive life and worklife expectancy tables and figures in an easily accessible format.

Part I reviews methods and data sources used in life tables: period and cohort life tables, survival data, relative mortality ratios for persons with medical risks, use of life annuities and structured settlements, calculation of retirement benefits, and life expectancy by educational attainment, race, smoking status.

Part II addresses methods of determining duration of working life. Detailed tables for all methods and many educational, demographic, smoking status, gender and race/Hispanic origin are provided. Biases are discussed and previous worklife estimates are corrected by including mortality rates by educational attainment. The increment-decrement model is carefully analyzed for correction of other potential biases. It also discusses the pros and cons of various methods.

Part III contains comprehensive tables of life and worklife expectancies for many different demographics. This is the most complete overview of life and worklife expectancies for attorneys, insurance professionals, and forensic economists available.

Product Code: 5368-MA • ISBN: 978-1-933264-74-5
Pages: 243 • Casebound • Size: 8.5" x 11" • Price: \$85

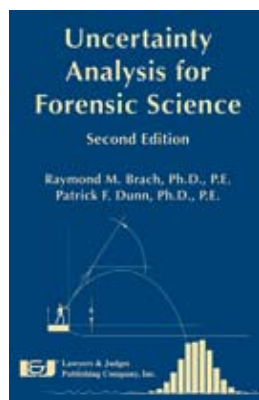

Topics

- Cohort tables
- Current (period) tables
- Persons with medical risks
- Effects of cigarette smoking on life expectancy
- The properties of survival data
- How to reduce or eliminate bias
- Standard errors of estimates
- Estimates of working life
- Increment-decrement worklife expectancies by sex, race, education
- Conventional model worklife estimates by sex, race, education
- Hispanic worklife expectancies by education and English proficiency
- Worklife expectancies by cigarette smoking status and education
- Median years to retirement
- Issues in estimation of worklife
- Female labor force patterns
- Disabled persons
- Current and future trends of labor force participation
- Comparisons of methods
- Sample calculations/comparisons
- Comprehensive life and worklife expectancy tables

Uncertainty Analysis for Forensic Science, Second Edition

by Raymond M. Brach, Ph.D., P.E. and Patrick F. Dunn, Ph.D., P.E.

This new edition has been modified and expanded with more case study examples and analysis. Covering a wide range of topics ranging from probability and statistical variables, mathematical relationships and equations, to sensitivity and design of experiments, this book serves to enlighten, inform and familiarize you with these particular ideas by applying scientific and medical knowledge to legal matters, giving you an edge in the courtroom.

Product Code: 6206-KB • ISBN: 978-1-933264-72-1
Pages: 208 • Softbound • Size: 6" x 9" • Price: \$35

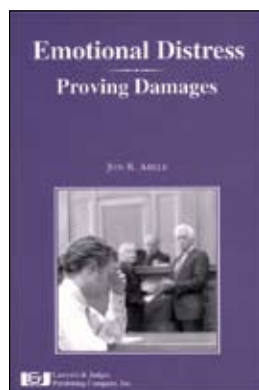

what they're saying

“Used by engineers and scientists to estimate uncertainty in measurements and calculations, the tool of uncertainty analysis can be applied to the work of legal forensic investigators.”

—SciTech Book News (May 26, 2004)

Emotional Distress: Proving Damages

by Jon R. Abele, J.D.

This book will help you be successful and avoid failure in emotional distress cases. The issue of emotional distress damages has perplexed the law for hundreds of years. While every person has both a physical and an emotional component, only one can be seen and examined. Courts have wrestled with these concerns, adopting rules and exceptions to the rules in an attempt to balance the competing interests of the parties, the court, and society in general.

Emotional Distress: Proving Damages provides a summary of emotional distress cases that have been litigated in jurisdictions throughout the country. You will read about

the different categories of emotional distress and which categories are most accepted by courts and jurors. You will also learn about the limitations that the plaintiffs have in claiming emotional distress, such as their relationship to the victim and being in the “zone of danger.” Order your copy today!

Pages: 164 • Softbound • Size: 6" x 9" • Price: \$29

Structured Settlement Calculator

by David Nelson, Ph.D.

Determines the present value of a structured settlement proposal and the future value of a lump sum. Includes complete instructions for use.

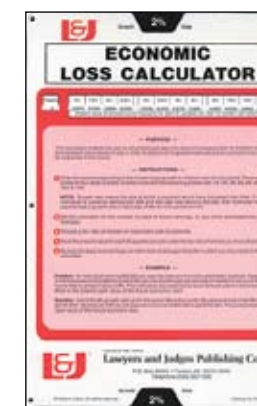

Product Code: 7035-MA • Slide Calculator
Size: 6.5" x 9.75" • Price: \$18.95

Economic Loss Calculator

by David Nelson, Ph.D.

Determine the present cash value of a future economic loss quickly and easily. Lets you take into account wage growth rate, inflation rate, and a present value discount rate.

Product Code: 7090-MA • Slide Calculator
Size: 6.5" x 6.5" • Price: \$49.95

Average Consumer Expenditure and Tax Level Calculator

Based on the latest Consumer Expenditure Survey, this calculator figures average food, transportation, housing and household expenditures by age, annual income, and family size.

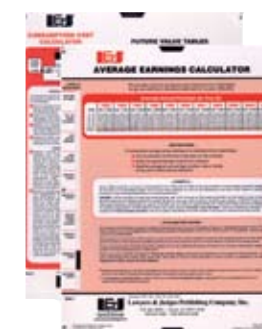

Product Code: 0626-MA • Slide Calculator
Size: 9.25" x 4" • Price: \$16.95

Average Earnings and Consumption Cost Calculator

by Michael Ruble, Ph.D. and Robert Patton, Ph.D.

Gives you the figures for consumption costs and loss of earnings in cases of disability or death, including future value tables with interest rates from 1% to 14%. Can determine loss over many years, based on age, education level, and gender.

Product Code: 7301-MA • Slide Calculator
Size: 8.5" x 11" • Price: \$24.95

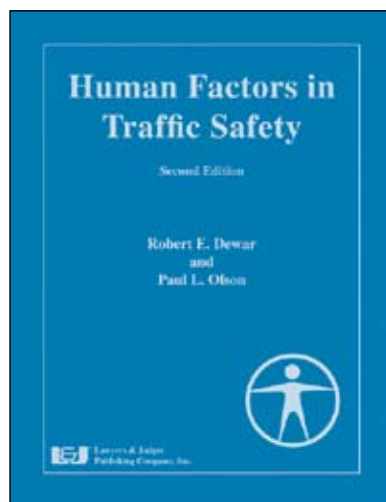

Essential Accident Reconstruction Resources

Human Factors in Traffic Safety, Second Edition

by Robert E. Dewar, Ph.D., CPE and Paul L. Olson, Ph.D.

No other book has presented such a wide variety of relevant topics applied to traffic safety. There are so many elements to every collision investigation in which you're involved. This book will give you guidance on how to identify these many elements by introducing you to the behavior of the road user. Driver limitations and driver or pedestrian error are the major factors in traffic accidents, contributing to about 90% of roadway crashes.

Many traffic safety experts have contributed to this book in order to give you a comprehensive introduction to human factors as it pertains to driver and pedestrian behavior and traffic safety. This new revised edition contains

new chapters on driver education and driver distraction.

Product Code: 5473-MA • ISBN: 978-1-933264-24-0
Pages: 549 • Softbound • Size: 8.5" x 11" • Price: \$119

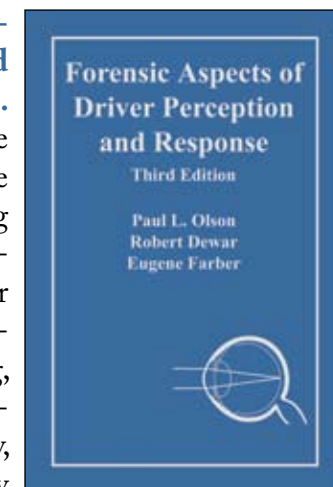

Traffic Accident Investigator Template

This template promises to make your job much easier! We've made it easier for you to use by including all of the stencils you need in one simple design. Stencils include vehicles from boats to motorcycles, all the standard street sign shapes, road stripes, curves and a ruler for accurately depicting the relationships between cars and roads. Scale: 1 inch = 36 feet.

Product Code: 6707-MA • Template • Price: \$15

Forensic Aspects of Driver Perception and Response, Third Edition

by Paul L. Olson, Robert Dewar and Eugene Farber

This new edition contains invaluable new information you need to know about driver perception and response and related human factors and design issues. This text contains the most current information available in the area of driver perception and perception-response time. Existing chapters have been expanded, providing in-depth coverage of areas such as light-reflecting surfaces, visibility-enhancing materials, driver age, gender and experience, fatigue, alcohol and drugs, speed perception and vehicle size, vehicle lighting and marking, glare, and more. Many of these were only briefly mentioned or not included in earlier editions. Additionally, new chapters have been added to present completely new material on many related driver perception and response issues including roadway design and the driver, work zones, railroad grade crossings, roadway signage, weather and driving and driver distraction.

Product Code: 5228-MA • ISBN: 978-1-933264-78-3
Pages: 494 • Casebound • Size: 6" x 9" • Price: \$99

Adhesive Tape Rule

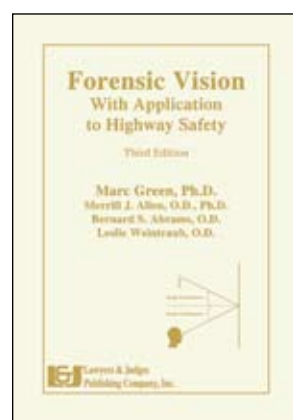

Bright yellow adhesive tape makes your job easier! Use this adhesive paper tape rule to accurately measure important evidence at the scene. This great product makes the accident investigator's job much easier! Includes 6 rolls, 60 feet each.

Product Code: 9057-MA • Price: \$60

Forensic Vision: With Application to Highway Safety, Third Edition

by Marc Green, Ph.D., Merrill J. Allen, O.D., Ph.D., Bernard S. Abrams, O.D., and Leslie Weintraub, O.D.

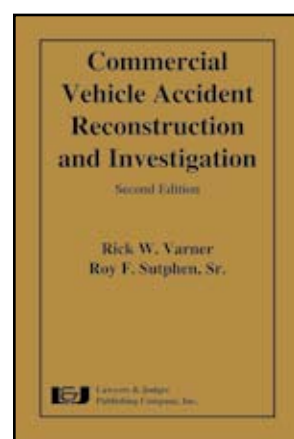

Forensic Vision is a foundational reference in the vision area. This book focuses on the roadway environment, primarily vision and the visual science that applies to analyzing road accidents and other accidents such as falls, medical errors, warnings, eye-witness identification, and more.

This new edition covers basic, clinical, and roadway vision. This includes scientific background information and experimental and investigation design and methodology. You'll find this book to be very practical, applying all of its material to accident analysis, with extensive information on analyzing accident scenarios involving visibility as well as tips for use of pictorial evidence in the courtroom, techniques for testifying about vision in court, and more.

Commercial Vehicle Accident Reconstruction and Investigation, Second Edition

by Rick W. Varner and Roy Sutphen, Sr.

A valuable tool in commercial accident reconstruction. Reconstructing commercial vehicle accidents is a complex task that is often misunderstood or misinterpreted. Frequently, mistakes are made in determining the vehicle's ability to brake efficiently, the engine speeds and the loading condition. This reference book identifies the proper techniques you should use in order to correctly assess a commercial vehicle accident scene. If you are interested in reconstructing or investigating commercial vehicle accidents, or if you are already involved in this but would like a better understanding of the issues, this book will prove to be a valuable tool.

Helicopter Crash Litigation

by Gary C. Robb

Simply put, an essential volume for any lawyer litigating a helicopter crash case. Accomplished trial lawyer Gary Robb, with thirty years of experience in handling such cases, leads you through the myriad complexities that inevitably arise from cases involving these unique flying machines. Justin Turner from the American Association for Justice says this book is "engaging, informative, and useful. Anyone new to helicopter cases should start by reading it cover to cover, rather than simply consulting it for reference. But it is also a valuable practical manual for more seasoned litigators."

Older Road Users, Myths and Realities: A Guide for Medical and Legal Professionals

edited by Morris Odell, M.B., B.S.

This book brings you state-of-the-art scientific information on the role of aging in driving behavior and accidents. As our population ages, older drivers increase concomitantly. In countries where driving is essential, evaluation of driving ability and implications of potential accidents have become a concern.

This book teaches you about older drivers, their driving behaviors and actual risks versus perceived risks. It includes the most up-to-date information, covering a broad range of topics such as medical conditions, psychological issues, visual impairment, and the influence of multiple prescription drugs and alcohol. Extensive chapters are devoted to diabetes, dementia, visual impairment, and prescription drug and alcohol use. Learn how to help people transition into post-driving status, covering issues such as alternative modes of transportation, community and family support, and therapy for psychological issues associated with this transition.

**Product Code: 4707-KB • ISBN: 978-1-933264-70-7
Pages: 320 • Casebound • Size: 6" x 9" • Price: \$69**

Eyewitness Reliability in Motor Vehicle Accident Reconstruction and Litigation, Second Edition

by Patrick Robins, Ph.D.

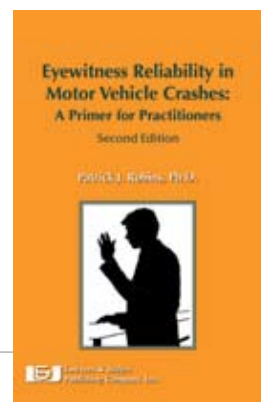

A necessity for anyone involved with eyewitness reports.

Eyewitnesses, especially in testimony, can be problematic. Two witnesses can contradict one another over the same accident scene. Some acquire post-event misinformation. And human memory, always unreliable, plays a crucial role.

This book prepares you for the courtroom situation, exploring all the fallible aspects of eyewitness testimony. Learn how a jury will evaluate eyewitness testimony on the basis of witness confidence and personality, and counteract this by learning what questions to ask your witnesses to get the most information, where to undermine the eyewitness testimony against you, and how to avoid the pitfalls of eyewitness evidence. Dr. Robins cites case studies, research, and seminar demonstrations that both interest and educate you.

By learning from one of the world's experts, you can make eyewitness testimony an asset to your case! Get your copy today.

Roadway Safety and Tort Liability, Second Edition

by John C. Glennon, D.Eng., P.E. and Paul Hill, J.D.

Essential for any case relating to roadway safety.

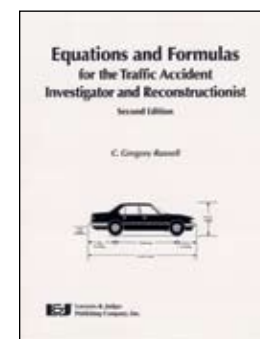

This book provides you with an extensive review of roadway design, traffic safety and legal cases. It examines the numerous attempts made to reduce the number of traffic accidents on our roadways and implicates the still-faulty practices and applications that continue to persist on U.S. roadways and railroad crossings.

This expanded edition examines the various components that make a road either safe or unsafe, for example, signals, barriers, and pavement drops. You can also review actual suits brought against states, municipalities and cities for accidents claimed to have been caused by roadway defects. Each chapter in this new section is dedicated to court cases involving the roadway safety topics discussed in the first section of the book. Includes a FREE copy of the 2001 and 2003 MUTCD on CD-ROM.

**Product Code: 5171-MA • ISBN: 978-1-930056-94-7 • CD-ROM Included

Slips, Trips, Missteps and Their Consequences, Second Edition

by Gary M. Bakken, CPE, Ph.D., H. Harvey Cohen, CPE, Ph.D., Jon R. Abele, Esq., Alvin S. Hyde, M.D., Ph.D., and Cindy A. LaRue, M.S., CPE

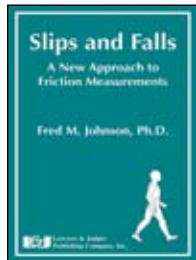

Answers your questions on how to determine fault and liability in a slip and fall case. This book will tell you how, why, and when people will likely fall, and the resultant injuries that come about. The case studies and examples help you understand the mechanics and causes of these accidents as well as environmental, human, and medical factors involved in falls. Includes the very useful *Fall Prevention Manual* for download.

Product Code: 5430-MA • ISBN: 978-1-933264-01-1
Pages: 375 • Casebound • Size: 8.5" x 11" • Price: \$99

Slips and Falls: A New Approach to Friction Measurements

by Fred M. Johnson, Ph.D.

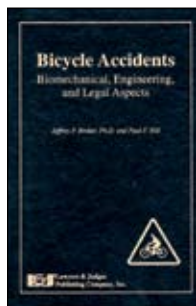

A back-to-basics explanation of the physics of friction in slips and falls. As well as slipping phenomena, other important and relevant friction-related concepts and applications are presented to clearly guide you through this complex topic. This book explains the use of equipment such as tribometers in measuring friction in falls and their level of accuracy. It is an essential book for any professional currently involved in the investigation, research and litigation of slip and fall incidents.

Neuroscience in the Courtroom

by William R. Uttal, Ph.D.

This book presents the most current research in neuroscience as it relates to the legal arena. Reading a person's mind is often attempted in legal cases, but there are many legal and ethical questions surrounding these attempts and the science behind them. The complications can become overwhelming. Here you'll learn from the most recent research about the distinctions between the brain and the mind. Actual science is distinguished from pseudoscience.

This text discusses the scientific validity of information from this research as it relates to use in the courtroom. Author William R. Uttal compares the results to

the standards for scientific evidence presented in trial set by the *Frye* and *Daubert* criteria. He makes recommendations on whether this information should be admissible in court at this time. This book is an excellent starting point for any legal professional looking to understand the human mind and how research on it has impacted today's court proceedings and presented evidence.

Product Code: 4381-MA • **ISBN:** 978-1-933264-38-7

Longshore Textbook, Sixth Edition

compiled by Steven M. Birnbaum, J.D., Stephen C. Embry, J.D.,
and Ralph R. Lorberbaum, J.D.

Now includes the full text of the Longshore Act, and the applicable portions of the Code of Federal Regulations. Long recognized as "the single source" reference guide for attorneys, adjusters, physicians, vocational counselors, and insurance professionals, this newly revised sixth edition presents an easy-to-read explanation of the Longshore Act from experts in law, medicine and administration.

In a clear, concise manner, this book evaluates and examines the Act, presenting important court decisions that affect its application. Legal decisions, statutes and regulations are cited throughout. Its treatment includes issues such as disability, occupational disease, coverage, benefits, vocational rehabilitation, employer's liability, ethical considerations, third party provisions, Medicare and more. Practical questions are also addressed: file administration, administrative procedures, calculating wages, trial practice, appeals before the Benefits Review Board, jurisdictional issues, and more.

Cross-Examination Edge

by Peter D. Polchinski

Now you can master cross-examination, “the greatest legal engine ever invented for the discovery of truth.” This is a how-to book. The focus is on how to cross-examine during a jury trial, but it will also show the reader how to confront any witness, in any kind of trial, hearing or proceeding, formal or informal.

Fear is natural, but it can be conquered with experience. As a practical matter, during cross, you are in total control; nothing happens until you speak. With adequate preparation, a positive attitude, and the skills you will acquire from this book, you can and will prevail on cross.

Challenges to Fingerprints

by Lyn Haber, Ph.D. and Ralph N. Haber, Ph.D.

This book is the culmination of years of meticulous research into the field of fingerprint comparisons, offering you an in-depth look at the reliability of this science. Beginning with a brief background into fingerprints, Ralph and Lyn Haber explain, in lay terms, the science behind forensic fingerprint comparison, and how exactly reliable is a fingerprint identification. They then take a more in-depth look into fingerprints and their use, including fingerprint comparison. A practice that has existed for over 100 years, fingerprint comparison has a very limited amount of research on error rates. This book helps fill that gap.

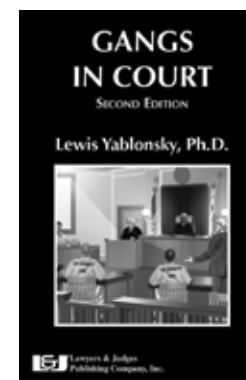

If you are a trial attorney, investigator, or any professional working with fingerprint data, you need this book's expertise on this pervasive—yet inadequately examined—subject. You benefit from over a decade of thorough research into fingerprint comparison. Buy your copy today!

Gangs in Court, Second Edition

by Lewis Yablonsky, Ph.D.

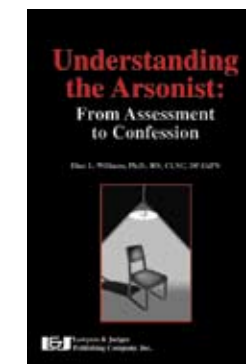

With over fifty years' experience working with gang members in and out of prison, Dr. Lewis Yablonsky educates you on the ins and outs of the gang world. This book gives you an understanding of all the complicated elements involved in a contemporary gang case, including racial, ethnic, and family issues; drugs and violence; emotional, psychological and social issues; criminal and non-criminal gang activity; gang social structure; the roles of members within the gang; and more. This new second edition has a brand new chapter from Los Angeles County Prosecutor Alan Jackson on the viewpoint of the prosecutor, a perspective that is seldom covered in reference works relating to the legal process in gang cases.

Numerous case studies on notable gang-related court cases are provided, expounded with Dr. Yablonsky's expert theory and analysis. As a defense or prosecuting attorney, police officer, psychologist, expert witness, or other professional involved with gang cases, you will gain invaluable insights into gangs and the legal process related to them.

Understanding the Arsonist: From Assessment to Confession

by Dian L. Williams, Ph.D., RN, CLNC

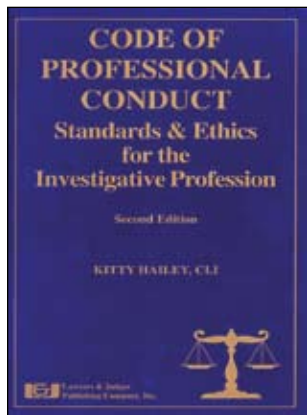

The latest qualified research into arsonist behavior. On average, half of all fires are arson. These crimes, which threaten human life and cause property damage, largely go unpunished and the offending behavior is often untreated. Written for fire and police investigators, criminal justice professionals and mental health professionals, this book provides insight into the types of individuals who become arsonists.

This text is a complete collection of extensive research into firesetting, gathered through interviews with actual or suspected firesetters, analysis of the data, and clinical interpretation of the findings. You'll learn about six specific psychological profiles of firesetters, their motivation for setting fires, and the types of fires they set.

Code of Professional Conduct, Second Edition

by Kitty Hailey, CLI

You will value this book as a tool to verify that you and your services meet the highest ethical and professional standards. *Code of Professional Conduct, Second Edition* has been prepared to advance the reputation of the investigative profession, to educate investigators and those who hire them, and to ensure that excellent standards of service and professionalism are upheld at all times.

While a majority of the professional investigator associations already invoke a code of ethics, the codes vary greatly, can lack important content, and change over time. Author and private investigator Kitty Hailey has compiled, compared and contrasted many of these codes. She has categorized and restated them with a strong emphasis on clarity of meaning and simplicity of language.

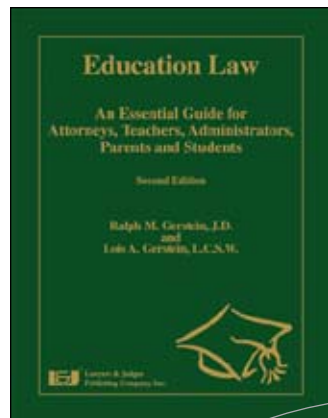

If you are hiring investigators, this book is invaluable in assuring that the investigators hired are indeed providing investigative services in an ethical and professional manner.

Education Law, Second Edition

by Ralph Gerstein, J.D., and

Lois Gerstein, M.S.W.

Your comprehensive road map through the complicated legal situations in today's rapidly changing educational environment. *Education Law, Second Edition* is your guide to creating standards for your school district and enforcing your legal rights in the classroom. You will be guided through the rights of teachers and other school employees, parents, and students through case studies of previous legal actions.

You may, for instance, be involved in even the most basic task of setting academic standards and yet still be affected by contract law and laws protecting individuals with disabilities.

The authors, Lois and Ralph Gerstein, analyze these legal issues from the points of view of students, parents, and school personnel, providing a well-rounded explanation of how local, state, and federal laws are interpreted in numerous and diverse education-related cases.

Forensic Science Today, Student and Teacher Editions

by Henry Lee, Ph.D., George Taft, Kimberly Taylor, J.D., and Jeanette Hencken

This is THE BEST introductory textbook on forensic science, brought to you by some of the foremost authorities on the subject. *Forensic Science Today, Second Edition*, takes a scientific yet exciting approach to the diverse study of forensics. It is an exceptional textbook for introductory forensic science classes for colleges, law enforcement, and academic high schools. This brand new edition includes scientific and forensic concepts taught in unique and exciting ways that are practical and meaningful to the student.

Dr. Henry Lee and collaborating authors provide an excellent way for students to explore the fascinating world of forensic science, and an invaluable resource for instructors. Dr. Lee is a world-renowned forensic scientist.

His testimony figured prominently in the O.J. Simpson trial as well as hundreds of other murder cases. Dr. Lee has assisted local and state police in their investigations of other famous crimes, such as the murder of Jon Benet Ramsey, the kidnapping of Elizabeth Smart, and the reinvestigation of the Kennedy assassination. This introductory textbook provides a comprehensive view of the many careers in forensic science and an introduction to the types of evidence and how they are collected and used in real-world situations. The instructor's edition includes a CD-ROM with helpful guides to use in teaching the material.

what they're saying

" This text is an excellent starting point to open the door to the fascinating world of forensic science. The companion material and the resources with references to excellent web sites add to the opportunities to prepare students for the steps to the next challenging level in forensic science. "

Haskell M. Pitluck
 Retired Circuit Court Judge, and Past President
 of American Academy of Forensic Sciences
